

SOP: Viewing Transaction Reports in bKash Business Portal

Purpose:

To guide users on how to view, filter, and download transaction reports (including previous day transactions) from the bKash Business Dashboard.

Step-by-Step Process

1. Login to the Portal

Go to the bKash Business Portal (<https://business.bkash.com/>) and log in using valid username and password credentials.

2. Open 'Reports' Section

On the left-side menu, click 'Reports.' A dropdown will appear with several report types.

3. Select 'Detailed Report'

Click on 'Detailed Report' from the dropdown list. This opens the detailed transaction report page.

4. Default View (Today's Report)

The system automatically loads Today's Transactions — including all payments, settlements, and credit records for the current date.

5. View Previous Days' Transactions

To view earlier data, click the 'Previous Days' button at the top-right corner. A filter panel will appear.

6. Set Filters (Optional)

Fill out the filter boxes as needed:

- Date Range – Choose start and end dates.
- Associated Wallet Number – Enter wallet (e.g., 01872863002).
- From/To Wallet Number – Optional for transaction direction.

- Transaction ID / Type / Channel – Optional for refined search.

7. Search the Transactions

Click the Search icon to view filtered transactions. The report table will update automatically.

8. Review & Download

- Click 'Details' beside a record to view full info.
- Click 'Download' to export the report in Excel/PDF format.

9. Return to Today's Report (Optional)

To switch back, click 'Today' at the top-right corner.

Quick Summary Flow

Login → Reports → Detailed Report → (Today / Previous Days) → Set Filters → Search → Download or View Details

Notes

- Always double-check the Date Range before searching.
- Use the Transaction ID filter if you're looking for a specific payment.
- Export regularly to keep a secure offline copy of reports.
